## ABSTRACT

MindsArt is an easy-to-use Android art gallery mobile application, with enhanced social media and unique gamification features, which turns its users' imagination into reality via its integrated image/story generation tools.

## RESULTS & CONCLUSION

Our extensive research showed that the current AI image generation applications typically lack gamification and/or social media features, MindsArt has developed with the aim to fulfill those shortcomings within a single, user-friendly application.

## ACKNOWLEDGMENT

We would like to thank our advisor, Dr. Instructor **Ayşe Nurdan Saran**, for all her efforts and assistance in our project.
